EDITORIAL CORESPONDENCE OF THE SENTINEL Madison, Feb. 3, '53...

The joint resolutions introduced by Mr. Bart lett, relative to the Nebraska business, were this morning referred to a select committee, consisting of Mesers. Bartlett, Gray and Donaldson, who will doubtless report very soon. They are published in the Journal of yesterday.

I sent you this morning an abstract of the Report of the Secretary of State. It will be noticed that the Secretary states that a large number of drafts have been presented to the Fox and Wisconsin Improvement Co., and payment refused, and that notice has been given that the holders look to the state for payment. From all that I can learn, the fault seems not to lie with the Company, but with the last officers of the state who had charge of the books. The paragraphs is brackets, in the Company's Report which I send you, dated Jan. 16th, will probably salte the invetery. Something ought to be donto obvious the difficulty, and effect a speedy settlement of all matters at issue.

It will be noticed that the Company, now that its officers have the thing in their hands fully, bea us out in all that we said, long ago, of the manner in which the finances of the work were managed by the agents of the state. I am glato notice, and all who wish well for the prosperer of the growing porth will be pleased to learn that the Company expect to have the line oper from Lake Winnebago to Green Bay in time to take off the fall crop. Railroads will doubtless draw off a great portion of the produce, and earry much of the merchandize, which would out them, take the Improvement route, but still it cannot fail to be of immense value to the country through which it runs, and must be remunerative to the company of enterprising me who now have it in charge. The state being rid of the responsibility of a work which would har ruined its finances almost past redemption, I am ready to wish all success to its successors. The Senate was in session but a short time, and

adjourned over till Tuesday: In Assembly, there was a good deal of time wasted in motions to adjourn, but these failing, and the rule prohibiting debate being enforced

considerable progress was made in the file of

Mr. Noggle offered a resolution calling for a report, within the next week, from the judiciary committee, on the question of the Liquor Law. As it was necessary that a rule should be suspended so as to allow of the consideration of the resolution to-day, Mr. Worthington moved the suspension; but Mr. Hull rose and gave notice of his intention to debate the motion, so that it went over. The Maine Law members declare their intention to introduce a bill themselves, if the Committee does not act soon. There is no doubt that the game of its opponents will be to delay action, and they will be materially aided by the change in the rules, requiring a vote of 3.5ths to call the previous question.

The bill has been reported giving the appoint ment of State Emigrant Commissioner to the Governor, and for a two years term, It is said to be the expectation of the Speaker to obtain the appointment, in case the Legislature does not abolish the office, and does pass the proposed

Speaker Horn having obtained leave of absence for some days, it became necessary to elect a Spoaker pro. tem. A motion to that effect by Mr. Earnest, was laid aside, Mr. Orton rising to delate it. Mr. Hale moved to suspend the rule precluding debate; but Mr. Donaldson rose to him in this capacity after his Free Soil declarations have reached them, they will be doing the Speaker pro. tent. A motion to that effect by debre that motion, and it went over, and the House went into Committee. But after the lapse of a few minutes Mr. Orton discovered that if the House should adjourn without electing a Speaker pro. um, it would be disorganized, and he moved that the Committee rise which motion prevailed, and the House elected Mr. Hull, of Grant Co. to the office, by a vote of 38 to 22 fc Mr. Noggle. Mr. Hull returned his thanks briefwice considered in committee of the whole, and afterwards ordered engrossed. Mr. Holl made very fair commencement of the discharge of the duties of his position, by appointing a good committed on the joint resolutions concerning Nebraska. Those resolutions will pass the House but it is mortifying to men of true Northern spirit, loving freedom and hating slavery, to hear doubts expressed as to the action of the Senate.

In the afternoon there was another long session in committee of the whole, and twelve more bills were got through to an engrossment. Among them were the bills allowing a levy of a special tax for ward purposes in the 5th ward. Milwaukee, and a joint resolution (these taking the course of bills) memorializing Congress for such change in the system of electing President and Vice President, so as to allow of a direct vote.

After this was over, the House voted on various motions to adjourn, ranging from 10 A. M. tomorrow to 10 A. M. on Tuesday, but the difficult ty was compromised by an adjournment to Monday morning, thus giving us a day of rest, very acceptable to all concerned; and the State will loss nothing by it.

I scarcely know whether it is worth the while to notice the ailly stuff which has been sent to the readers of the Wisconsin about my being a candidate for office here. In spite of the ridiculous effort to shift responsibility by a pretense o ickness, the precious document bears the earmarks of the writer, in Wauketha, of the glowing campaign letters to Wankesha, last fall, from the Northern counties. No one who bas any knowledge of his proclivities will need any assurance that his assertions are purely original. I hold a better office than any which the State could give me, and have ne ambition even for a complimen tary vote. Office is not my " vocation."

Saturday, Peb, 4th, 9 A. M .- The Sentinel of vesterday brings a despatch, which I am very loth to believe, stating that the Wisconsin land grants-for whom and for what companies, nothing is said-have passed the House. The operacors here have succeeded in delaying all action upon the joint resolutions protesting against these in this State, of whatever party, that has taken grants until it now seems too late. Perhaps, how- ground on this question, is apposed to the house ever, there is yet time to send them on to the Senate, as the voice of the people against the Morning Nows. Our Legislature should lose no speculators. Which of these companies most conspicuous in asking for grants in Wisconsin, can ty. plead a consequent increase in value of U. S. lands along their route, as an excuse for their request? What other reason can they give than a desire to obtain possession of large tracis of iands elsewhere than on their route? THE LAND GRAB.

We received on Wednesday last a despatch from Washington announcing that the bill granting lands to Wisconsin in aid of certain Rail Road passed the House, on the 31st ult. For House read SENATE, and the news is correct. The bill passed the Senate, with little debate and, apparently, without a division. It has yet to get thro' the House; and will, we earnestly hope, be killed dead n that body. The proceedings in the Senate, on New York Tribune:

The bill granting alternate sections of land fifteen miles wide to Wisconsin for construction of certain railroads therein was taken up.

Mr. DAWSON opposed the bill and thought it ought not to pass until Congress had determined upon some permanent policy with respect to the apon some permanent policy with respect to the listribution of the public lands. Every State ought to have its share in them—be hoped it Mr. WALKER explained that this bill was in

the exact form of all others of a similar character which had been passed.

Mr. DOUGLAS said the bill would lead to

ar. DUCCHAS and the bill would lead to debate. The time for taking up the Nebraska bill had arrived. It was understood that the bill was to be considered from day to day until disposed of. A Senator had the floor and was entitled to go on. He moved to postpone this bill to take go on. He moved to postpone this bill to take up the other.

Mr. WALKER said he would consent to the postponement as it was the general desire to take up the special order,

The Wisconsin bill was accordingly postponed to take up the Nebraska swindle, but after a brief debate this last was laid over till Friday February 3d, whereupon, continues the report, "The Wisconsin Railroad bill was again taken up and

This is the whole record. What the bill is, we do not know; but presume that it denotes some millions of acres of land to the Rock River Valley Union Rail Road Company, and the La Crosse and Milwaukee Rail Road Company .--We greatly desire to see this last road built, and should oppose no objection to the building of the former by fair means and in an honest way. But we are utterly opposed to squandering the Public Dumnio upon Rail Road corporations, and so, we believe, are four-fifthe of the People of this State. Our Senators and Representatives who introduce and support such measures grievously mistake and misrepresent the public sentiment of Visconsin. There is hope and opportunity, however, of defeating the bill in the House of Repsentatives, and the members from this State ought to be promptly and explicity instructed or. the subject. Let Remonstrances against the proposed Rail Road grants (it matters not to what Company) be circulated, signed and sent on to Washington without delay. Let us save, if we can, the Public Domain from the horde of Speculators and Monopolists who seek to appropriate to their own selfish objects and uses the great herriage of the People.

Fox River Valley Railroad,

Does any one know what is the condition of affairs with this Railroad Company, chartered last winter. Unless we are very much mistaken the charter authorizes a branch from Burlington to Milwaukee, and there are two or three Commis sioners names in the bill who are residents of our city. Looking forward to the time when the Railroad shall be completed from Racine to seloit, is it not time that something should be one towards securing the early completion of the mportant link of road referred to, a part of the ine extending through Beloit, and so southwestwardly to the Mississippi? By the time this rack can be completed, our city will be in daily connection with the air line route eastward nerosa Michigan, and the business which would pass over the Racine and Beloit road, and Fox River Valley Branchtowards this city would be very large. We hope that some of our Ballicad men will look after this matter, and move promptly.

FROM OUR WASHINGTON CORRESPON- of the country; and then, forsooth, it will be a icdini in the Senate-The Brie Question-The Nebraska Bill-Senator Daughts.

Washington, Jan. 27th.

The Senate opened this week with some very good speeches all round, in regard to the indignities said to have been offered to M. Bedini the Papal Nuncio at Cincinnati, Baltimore, and elsewhere. Mr. Cass was earnestly indigoant, having a son at Rome, whose relations with the Papal this bill, are thus sketched in the report of the authorities might be unpleasantly affected by any want of respect shown to the representative of the Pope in this country. Mr. Mason was classically indignant, and expressed the hope that the Americana would not be like the old Romans, who had but one word to designate a foreigner and stranger. Mr. Dawson was sectionally indignant, and, like the old Pharssee, thanked God that such things did not happen at the South, which, fortunately, was free from all isns and riots ;-remarking at the same time that the Reverend gentleman could go from one end of his State to the other, and (at the suggestion of Mr. Badger) throughout the entire South without melustation; and forgetting, all the time, that it was in a Southern city (Baltimore) that the alleged outrage occurred, which was the immediate occasion of the subject being brought to the atten tion of the Senate. Mr. Douglas was nationally indignant; -- believing that no particular section should be held responsible for occasional loca outbreaks, which might take place in any part of the country, and which all right minded persons, n every section of the land, united to condema Mr. Exerctt was gracefully indignant, and with bis dignified manner, his musical voice with its rich intonations, his well turned periods, his felicities of diction and his impresive delivery, secured the profound silence and rapt attention of his auditors during his short speech. Other gentlemen were indignant according to their individual peculiarities, and the proprieties of their position: out Mr. Weller of California, I thought, was the most sensibly indignant and took the most correct view of the whole subject. While, he said, (I give only the tenor of his remarks) he had no empathy with the mob spirit, and would not approve or sanction any act of violence committed nder a government of law, he would still assert the right of the people, at all times, peaceably to assemble, to manifest their sympathy for any peron, be he citizen or foreigner, and equally to express their disapprobation of any one's character and conduct. The cause of the manifestations of opular feeling in the case of Bedini, is found in the simple fact that this personage was believed. by a large class of German and Italian emigants ow in this country, to have been instrumental is suppressing the revolutionary movements of 1845; to have evinced at that time the most bitter lesstility to the cause of liberty; to have been guiffy of acts of oppression and inhumanity; and, especially, to have sanctioned or connived at the execution of Ugo Bassi, who was barbarously murdered under the form of law. Mr. W. did not profess to decide upon the correctness of the curout reports in regard to this gentleman's past history, but he thought, if one half of the charges preferred againt him were true, it was right and proper for those whose hopes had been crushed out, and whose sensibilities had been outraged, peaceably to assemble, to express their abhorrence of one whom they regarded as a blood-thirsty tyrant. The Senator's remarks were received with evident favor by the large crowd in the galleries, who, if they were restrained by respect for the place from giving an enthusiastic expression

> nificant demonstration of their understanding of the subject. On the whole, it was a very respectable, "indignation meeting," and, if it will not be likely to affect materially the Eastern question, yet certainly Buncombe was considerably edified. As to legislative action was proposed or contemplated must have been-indeed this was avowed-to give a healthy direction to public sentiment and to manufacture public opinion. It is respectfully suggested to the distinguished Senators, whose alarm is so easily excited by any indication of help Mr. Pratt loppy some rills on he left the jail so tremblingly sensitive to the honor of the country endangered by such occurrences, that when "O you see I po poss from de jail, an I pe round hey have manufactured sufficient public sentiment to regress all other grievances, and to put down all signs of popular disturbance in other quarters, they would turn their attention to manufacturing a little, to represe the very slight to Parber's. be the case. In the House, the Eric difficulties came up for discussion in the Committee of the Whole on the der Canal Certificates and Stocks of other States of that immortal borough, and the evident sympathy with and connivance at it by the State opinion of Judge Black, of the Supreme Court of that State, to the effect that the Franklin Canal question, or that its charter bad been declared void, or abrogated; and he said nothing, and could say nothing, to justify or extenuate the damning fact, that the citizens of Erie had taken the law into their own hands; that they had defied the mandates of the courts and resisted their officers by force; bad interrupted a great channel of trade; had inflicted great inconvenience and distress and immense pecuniary loss upon the public, and brought disgrace upon the whole country—and all that, despite the natural laws of growth, Erie might be made a great place of. The very significant intimation was thrown out in the course of the debate, that, if Pennsylvania by the late disturbances, might be disposed to enquire whether there was any necessity to tax themselves to support the vital interests of a State, which, in the blind and narrow pursuit of its own aggrandizement, was disposed to ignore all rules of comity, to violate its plighted faith, and to wantonly sacrifice the rights and interests of her sister States. The question has been often asked, why has not the Government interfered to put down insurrection, and enforce obedience to to the decisions of the Federal Courts? and the only answer that has been given to it is-that Governor Bigler has been on to Washington to see President Pierce. What the logical connexton between the two facts is, I leave others to deter-

mine. In the Senate on Tuesday, a spicy preliminary skirmish took place on the Nebraska bill, which was finally made the special order for Monday next, when the grand campaign will fairly open. This is the all engrossing subject of interest here now, and all sorts of speculations and rumors are rife as to the probable course of different members of Congress in relation to it. The 'Union," after having boxed the compass several times, and being tossed about upon the sea of uncertainty and inconsistency—veering day after day from Scylla to Charybdia, has at length concluded that it will best avoid the peril of political navigation by sailing due South. The Administration, after considerable hesitation, and with evident reluctance, has given in its adhesion to the measure, and the support of it is to be made the test of orthodox Democracy. The only hope of passing it is by hurrying it through both Houses before the thunder fones of public indignation shall strike terror into the weak hearts that are now ready, at the beheats of party, to

sacrifice the rights of the North and the interests

finality! a compromise! and must not be disturbed, or the Union will be dissolved. A compromise I "I thank thee Jew for teaching me that word." The country has now the most indebitable evidence of the regard which Southern politicians have for compromises when they stand

in the way of their sectional prejudices and interests. I know it is said that this bill only proposes to carry out the compromise of 1850, and is in accordance with it; but it seems that more shameless and barefaced lie never was uttered. The compromise of 1850 in express terms recognizes the validity of the Missouri compromises of 1820, in the act providing for the formation of the Territory of New Mexico; and its validity was recognized all through the debates of that memorable period. Mr. Webster, the great Northern supporter of the compromise, expressly put his support of it on the ground that from all the existing territory of the United States, slavery was virtually excluded by the law of 1820, or by the laws of nature. Not a word was breathed of repealing, superseding, or annulling either the letter, or the spirit of the compro mise of 1829. Congress did not so understand it : the country did not so understand it. No Northern man, who roted for that compromise, could have justified himself for a moment in the eyes of his constituents, if they had dreamed hat such was the fact; and the least bint of such an interpretation, would have at once have consigned that compromise to "the sleep that knows waking." The true doctrine set forth in this bill is, that no compremise is binding-that no empact between the North and the South, howver solemn, however long acquiesced in, with whatever weight of prescriptive sanction and of positive law it may be sustained, is good for any hing-after one party has enjoyed the advanages of it. The doctrine is a dangerous one for

tors" of it. I am happy in being able to say that, as yet. o reports have reached me of the Union being in langer, which would make it necessary to pass the proposed bill at any rate; but I suppose the eriodical crisis bee not yet arrived, and that, if here is any danger of this bill sticking, the alarming symptoms will begin to manifest themelves, and merely to "save the Union" it will e passed—aa a final compromise—final until the South will want some new concession.

Mr. Douglas from Illinois seems disposed to stablish a two fold claim to the gratitude of his country-by bringing in the bill for organizing he Territories of Kansas and Nebraska, and by his proposed measure to relieve the country at large from all responsibility in reference to river and harbor improvements, by giving to the States which lie contiguous to the great channels of commerce, the right to impose tonuage duties in aid of the improvements which these channels may require. How considerate to all the new and comparatively feeble States in the West and North West, to have the expense of the improve ments of their Lakes and Rivers, which are essen tial to the growth and developement of the whole country, defrayed, not out of the resources of the shole country, but by a local tax upon the prolucts of these States going to market, and opothe goods and merchandize brought back for nome consumption! Senate oill reporting small bill law was indef-Draining of the Muskego Lake,

In Senate, January 31st, Mr Reymert submit ed the following report, to wit: The committee on agriculture and manufactures to whom was referred a bill authorize the draining of the Muskego and Wind Lakes, have had the same under consideration, and

REPORT: That your committee is unanimous in recomending the passage of said bill for the following

menning the passage of said office the following reasons:

The towns of Muskego and Norway, in the counties of Waukesha and Radine, are so situated that the waters of said lakes and marshes cover a very extensive portion thereof. In consequence of the flatness of the country and the want of any adequate outlet, said water is left there to evaporate and strongle, creating an unhealthy, atmosts and strongle, creating an unhealthy, atmosts and strongle. ndequate outlet, said water is left there to evaporate and stagnate, creating an unhealthy atmosphere and consequent disease among the inhabitants, which has been right severely, especially at such seasons of the year when on the health and strength of the husbandman depends the prosperity of the country.

Experience has shown that there is no other or sufficient way to remedy evil, which the inhabitants have so long suffered, than by the draining of said lakes into Root River; and the feasibility of the plan is evident to every person facilities with the leaviller.

ing of said lakes into Root River; and the feas-ibility of the plan is evident to every person fa-miliar with the locality.

About 12 sections of bottom lands which have been entered at the land office and purchased by the people of said towns, and which are now only accessible in very dry seasons, would be rendered valuable and productive to the owners, who have long auxiously awaited that the nuisance created by the staguation of said waters, would be aba-ted.

by the staguation or said waters, would be abated.

The only outlet from said lake is the Muskego creek, which flows into the Fox River at the village of Rochester in the county of Recine and the nature of this creek is such that it is, and in all human probability soon will be, insufficient to carry off a desired quantity of water to preserve the health of community. At the outlet of said creek a dum was built at an early period. In 1837 there was sufficient water to run a saw mill continually, but in after years, as the country beon there was summer water to rub a saw mill optimually, but in after years, as the country be-ame settled and cultivated that stream has so came settled and collivated that stream has so decreased that there is not water enough in the summer, time to be of any value for manufacturing purposes and hence the sail dam has been suffered to go to destruction by the parties interested therein. The small quantity of water emptying, through the Muskego creek into the Fox River does not affect the mill powers on the River, for when there is any useful amount of water in the Muskego creek there is a largo surplus in the Fox.

CAUTION.—Office Rock River Valley Union Railroad Company, New York Jan. 27 1854.—The public is cautioned against purchasing any bonds of this company issued in 1851 for one thousand dollars each, payable January 1, 1872, with seven per cent, interest, warrants attached, and numbered from 921 to 980 inclusive, held by the Eastern Bank of West Killogsly, Ct. as this company deny the title of said bonds.

J. W. Cerrier, Treasurer, R. R. V. U. R. R. Co.

The amount of swamp lands left unentered at

The amount of swamp lands left unentered at the land office is comparatively amail and is now totally without value, and can only be made useful by some improvement of the nature contemplated in said bill.

The waters thus injuriously retained in said form would vary materially benefit the mill privilege and manufacturing establishments on the Root river and add to the amount of water in the Harbour of Racine; thus in one part of the contry absting an insufferable nuisance and conferring value and benefits on another.

All of which, is respectfully submitted.

A man named Michael Cushing was brough up by constable Meloy charged with threatening commit an offense against the property of Thomas Burns on the 25th Dec. last. The de fendant was required to give ball for his appearance this morning at 10 A. M. Assault and Battery.-The court was occu-

oied during yesterday afternoon with a jury trial a which a man named Joseph Meysac, was charged with committing an assault and battery, upon Gregoire Hyer on the 3d of Feb. The substance of complainants testimony was that a dif-ficulty took place about some boop poles and that defendant struck him with an axe cutting his hand. Several questions were put on the crossexamination as to whether the complainant had not struck defendant first : but all failed to elicit the answer sought by defendant's counsel; when Mr. LEANHARD, rising, said to the interperater You ask him if he didn't never struck him be fore." This question was answered by a burst o laughter from the crowd. Another witness named Jones, was called and sworn for the pros ecution. Counsel-"What were you making those faces for just now, and running you tongue out at the jury !" Witness, (who about three cheets in the wind)-" Well, its a natural defect I've got, I put my face out o' shape cometimes if you want me for a witness, you must take my face as it is. Counsel "Have you been drinking to-day! Witness (laughing) Oh no! only four or five glasses (dropping his head and voice) of cider ! The counsel remarked he would waive an examination of the witness, who left the stand and indulged the crowd, with a series of grimac that would have done honor to a "Grimaldi." The defense by several witnesses show ed that the complainant first attacked defendant took him by the throat, and that defendant took up the axe in self defense. One of the witnesse

Witness, a little not much. Juror, Was ist dein nahme? The witness here shook his head, and aid he didn't understand, (laughter.) The case was submitted to the jury who retired and in a few minutes brought in a verdict of not

guilty. The counsel for the prosecution, the court and others present were frequently interrupted by the whispering, laughter, etc. of the assisting defendants counsel. The repeatedly requested to be quiet, by the court, and the defendants other counsel Paine and son, he still kept it up. We have no desire to interfere, farther, than to say hat giggling, making faces, constant loud which perings &c. are out of place in a Police Court durng a trial, and exceedingly annoying to those who have to direct their attention enrefully, i order to give the case in print to the public. FIRE IN THE CATHEORAL AT LOUISVILLE.—The alarm of fire about I o'clock yesterday, caused great consternation by the report which spread through the city that the new cathedral was on fire. Thousands rushed at once to the seene of director the seene of fire. Thousands rushed at once to the seene of disaster, to save the magnificent structure from falling a prey to the fiames. The fire, it seems originated from a stove pipe which leads from the basement of the Cathedral, used for a school to the flue in the main building. It commenced in one of the corners on the north side. Owing to the great height of the building, much difficulty was experienced in reaching the firme. After three hours' unremitting labor, the firmen, aided by the citizens generally. Suppresed the flames. three hours' unremitting labor, the firemen, aided by the citizens generally, suppresed the flames. The north side of the building was much charred and injured by water. The splendid organ sustained considerable damage. The costly paintings and other valuables as well as the furniting were removed; but they all sustained more or less 'datuage' from 'water. The building has been damaged to the amount of several thousand dollars. It was insured for \$15,000.—Louisville Journal Jan, 25. COMMERCIAL.

REVIEW OF THE MARKETS. FOR THE WEEK ENDING FEB. 7.

OFFICE OF THE DAILY SENTINGL, MILWAUERE, February 7, 1854. Since our last review Breadshift have given way a lidde under the influence of the Asia's naws, in ugh the subse-quent and more favorable advices by the Archia have re-stored the tone of the market, if they have not quite raises firm, and considerable purchases were made. We note among others, 10,000 bus mixed wheat, free on board, at 1,25 cash; 5,000 do. from B. R. depot, delivered, 1,22% and 3,000 do. at 1,22. White wheat sells readly at 1,249, 1,29. Oats are quick at 30,231; Barley at 80 and Bye at 76. There seem no reason to doubt that prices will rule high during the coming Spring and Summer. Whether war comes or not, there is a large deficit in the Foreign harvests comes or not, there is a large deficit in the Foreign harvests to be made up by imports from the United States and our own stock on hand is unestably light. If upon the back of this comes a general war in Europe—as is possible, if not probable—prices must advance even above their present high marks. Our Farmers, therefore, should make timely preparations to sow largely of Wheat, Oats, Hye, Barley, rn and Potatoes, as soon as the weather and er nit; and they can safely count upon remune

for all they raise.

Pork has advanced rapidly since our last; light bogs commanding 4,50@4.75; medium 4,75@4,90 and heavy and extra 4,95@8,12½. Mess Pork; and Lard have shared in this advance. Packing continues in full blast, and the amount at this port, at the opening of navigation, will coniderably exceed that of any former year.
The winter, thus far, has been most favorable for all the negative production of the State, and the grain sown last all looks thrifty, thick and vigorous.

Latest Phase of the Eastern War-Negociation —The War-Persian Affairs.

From the London Times, Jan. 13..

The answer of the Emperor of Russia to the in The answer of the Emperor of Russia to the intimation that the combined fleets of England and Prance have been ordered to enter and occupy the Black Sea has not yet arrived, but it appears by information transmitted through Vienna that, even before the orders last sent to the British and French Admirals could be executed, the Russian Government had commanded all its vessels of cour to return to Schattopol, so that on one element at least the Emperor retires. It deserves observation, that although the Russian croisers have been thus withdrawn, the Emperor has not as yet manifested any intention of withdrawing the Imperial Envoys. His policy still is to avoid as long as possible a direct rupture with the maritime Powers, and he may oven consent to name a Plenipopossible a direct supture with the maritime Powers, and he may even consent to name a Plenipotentiary to attend the proposed conference, for the purpose of bolding his antagonists in suspense, if not of terminating the dispute. In the meantaine the answer of the Potte to the proposals of the Four Powers, and to the Collective Note of the 5th of December, has reached Vieuna. Reported for the Sentinet.

New Orleans, February 4.

At 3 o'clock this P. M. the Steamer Charles
Riccher, just arrived from Nashville, caught fire
and in a short time was totally consumed, with
ber valuable cargo of Cotten, Tobacco and Westera Produce. Many passengers in the cabin bareiv escaped with their lives. 15 or 20 Negroes
perished in the flames.

The fito spread to the steamer Natchez, which
with her cargo of two thousand bales of cotton
was entirely destroyed. The steamer Cairo next
caught fire, and was burnt. The steamer Sultana
and Grand Turk also caught fire, and were consumed. A number of barges, loaded at the levee,
caught fire and were also greatly damaged.

The doubts which must attend the further pre-gress of this work of pacification, depending as it now does entirely on the assent of Rassia, are not lessened by the last incidents of the war. We at-tached little credit to the assertions confidently put forward by some of the foreign papers, that an action in which the Turks defeated 25,000 Russians had been fought in Little Wallachia, on the 19th of December, for had that statement been Russians had been fought in Little Wallachia, on the 19th of December, for had that statement been correct it must long ore this have been confirmed. But we have now intelligence through Belgrade, on which reliance may be placed, to the effect that the Turks, on the 6th inst, with a division of 15,000 men, attacked the Russians in an intreached position not far from Kalafat, and carried it with great slaughter—the Russians i aving lost according to this dispatch, 2,500 men. A reinforcement of Russian troops, advancing from Karaul, was also repulsed with loss. Citale or Tchetali, where this sofial occurred, is a place overlooking the valley of the Danube, about six miles higher up the tream than Widdin and Kalafat; and it is probably the Russians hoped to turn the Turkish position, and perhaps to cross the river, at or above this point. To have thus assumed the effensive, and attacked with success a Russian division in an intreached camp, is by far the greatest exploit the Turkish army has performed since the commencement of the war, and we await with received interest the article of which a present of the war, and we await with received as the commencement of the war, and we await with received as the commencement of the war, and we await with received as the commencement of the war, and we await with received as the commencement of the war, and we await with received as the commencement of the war, and we await with received as the commencement of the war, and we await with received as the commencement of the war, and we await with received as the commencement of the war, and we await with received as the commencement of the war, and we await with received as the commencement of the war, and we await with received as the commencement of the war, and we await with received as the commencement of the war, and we await with received as the commencement of the war, and we await with received as the commencement of the war, and we await with received as the commencement of the war, and we await was a summent of the

with great interest the arrival of further particulars. It was clearly, however, of essential importance to the Turkish commanders at Kalafat to dislodge the Russians from a position which gave them the command of the upper portion of the river, and was doubtless intended to play an important part in the operations contemplated against the lines of Kalafat itself. The intelligence of this engagement comes through Servia, and reached the Servian authorities at Belgrade on the

reached the Servian authorities at Berghaus on the 10th.

The most important intelligence, however which we have received from the East to-day concerns our relations with Persia. A quarrel had arisen between the British Charge d' Affairs at Teheran and the Persian Court with reference to the affairs of one Hadji Abdul Kerim, a nativo of Candahar, protected by the British Government. This person, who is man of great wealth, has demands upon the Persian Government which it has been the duty of the British Legation to support. The Persian Government, on the other hand, claimed him as its own subject, liable to all such exactions as it might please the the other hand, claimed him as its own subject, liable to all such exactions as it might please the Shah to put upon him, and at length refused with so much insolence to grant the redress which the case required, that the British Charge Il Affairs, Mr Taylour Thompeon was compelled to suspend diplomatic relations with the Ministers of the Shah. The effect of this spirited measure was prompt and effectual. Within a very short time the Persian Government showed its roadiness to comply with his demands and to restore friendly relations with England. The tables were completely turned on Prince Dolgorouki, the Russian Minister, and although he threatened the Shah of Persia with the supreme displeasure the Shah of Persia with the supreme displeasure of the Czar, his master, and exerted every means to restore Russian influence, the British Charged of the Czar, his master, and exerted every means to restore Russian influence, the British Charged' Affairs remains, for the present, master of the field. Mr. Thompson appears to deserve great credit for his firm and judicious conduct in this emergency, but the effects of his success were not confined to our own relations with Persia.—Difficulties had arisen, as is well known between that country and Turkey; the two States were on the brink of war, and it was said that Persian troops were preparing to march under a Russian officer to attack the Turks in Armenia. Fortunately, the settlement of the dispute with Eagland seems to have included an arrangement with the Porte, for the Turkish Minister at Teheran has received positive assurances from the Sudder Azim, or First Minister of the Shah, that no movements of troops hostile to the Ottoman empire will be made by Persia, and that the forces concentrated in the northern provinces of the kingdom are placed there solely to watch the progress of events, and to prevent internal disturbances. Thus far, then, the Russian Government has failed in its designs upon Persia, and in the attempt to convert that country into a source of annuagene to the Rigidle propries.

mission in that country, where the eubassies sent in the early part of this century laid the founda-tion of a long and useful nlinee. For the present, however, the difficulties which seemed to threaten

THE AMERICAN Magnetic, Swing Machine Co., NOW OFFIR FOR SALE AT THEM RACING
397 EFFORMALLY, W. Y.,
By far the most perfect and valuable Sewing Machine
that have yet been invented.

THE I UBLIC are respectfully invited to call at the rooms of the Company, and examine the operation of the most superior machine ever presented to their notice. It is the result of three separate inventors, each of whom distinct in himself, chains originality. The first of whom is ELLAS HOWE, the first inventor of sewing Machines, who introduced the sitution movement, without which every matchine is comparatively useless. The next was THOMISON, who estapted the machine to continuous of tailors' work, and Mr. COON, by means of the peculiar formation of the shuttle combidies with other recent improvements of his own lovention, has made a machine capable of doing any and all work that can be effected by means of the needle. The machine tow differed for sale presents the following distinct and peculiar features:—

1st. It is extremely simple in its construction, and in no ware liable to get out of order.

2d. The stitutes are uniform, period, and precent aboutful appearance news before attained by any muchine.

3d. The sawing done by this machine is varianted by reformance from those rowing machines of a different character.

4d. Any and all kinds of work can be done on our maline with unusual facility—silk, linen, cotton, or worlen fabrics and leather, each present the same beautiful appearance.

3d. It has made in the process of the same beautiful appearance.

fabrics and leather, each present the same beautiful apparame.

Sit By means of feletion rolloys the threat can be made tight or feose upon the solut at the will of the operator.

Git. The length of the sticker can be graduated with mathematicate accords by the operator, from the met and delicate attent requisite in shire making, then becomes, collars, occamental works, etc., up to the coarset stick reaching to leather, etc.

7th. The finest curvature can be worked, and beautiful designs of flowers, baskets of fruit, representations of hearts, brids, etc., can be as selegating and elaborately worked by the aid of this machine as by the most skillful seam-stress in existence.

The American Magnetic Sewing discatine Co., Have determined to solithe best Sawing Machine in exist eace, and have succeeded beyond their warmest anticipate thous. The speed of the machine is also a great feature that must secure the attention of the purchaser. It will take with race FIVE HUNDRED STITCHES PER MINUTE!
